

Minutes of Group 8

Sijun Zhang 516370910155
Yunping Chou 516370910156
Tianyi Ge 516370910168
Fubo Qi 516370910175

1 Progress:

Because P1 is just finished and we had the mid-term on Thursday, this week is mainly focus on the exam and the oncoming P2 proposal. We discussed our origin ideal, the smart bicycle lock, and realize that our project is a little bit easy for the main function is integrated. We try to figure out if is there any extension we can make to make our project more useful and useful. Make a rough draft of our proposal.

2 Problems:

- The time left for P2 is limited, we are not sure whether we can deal with the additional function well.
- Still, we are uncertain about our main toptic of our proposal.
- Worries about the technologic problems, we are not prepared enough.

3 Conflicts:

In the discussion, we agree on that we need add some new features to our project, while we can not reach an agreement what to add and how considering there are just less than a month left. Qi tries to integrate a GPS navigation to the system while he is unable to persuade others that this function can be reached within a month.
